## PROJECTS

### BankGuard

This banking app allows users to manage payments, cash advances, debt tracking, money transfers, and more. It was built with ASP.NET MVC, C#, Bootstrap, and SQL Server for secure data storage.

### Friend App

This social media app lets you share experiences with friends by posting images or text, commenting on posts, and adding popular connections. Also built using ASP.NET, Entity Framework, C#, JavaScript and SQL Server.

### Nicochat

This real-time chat app enables users to send messages, share images, and customize their experience with themes and profile options. Built with Node.js, React, and MongoDB.
